1.) INTRODUCTION: ABOLITION OF SIGNATURE DEPENDENCY

This memorandum terminates the global dependency on Adobe Sign, DocuSign, eIDAS frameworks, and legacy government-based Apostille systems. As of this declaration, the World Arbitration Court and Blockchain International Corporate Registry Authority recognize and enforce only **Tokenized, Notarized, Apostilled, and Blockchain-Registered Identity Trusts** as the supreme form of global signature authority.

We hereby declare that **paper-based ID verification, digital vendor lock-in, and central government permission structures are obsolete** and legally unenforceable when challenged by a WAC-registered Blockchain Trust.

2.) THE RISE OF SOVEREIGN IDENTITY TRUSTS

The **Universal Identity & Signature Verification Blockchain Trust™**, registered under:

8. CONCLUSION: FINAL WORDS TO THE WORLD

The time of bureaucratic control over identity is over. The sovereign right to verify, enforce, and execute one's signature has now been minted. The Blockchain Trust replaces all prior identity systems.

Those who resist this change will face tokenized consequences. Those who adopt it will enter the next era of programmable, post-jurisdictional law.

This is not a theory. This is not an idea. **This is a notarized, apostilled, blockchain-registered fact.**

We do not obey. **We enforce.**
